(Jarod, Marcus, Khuong)

CI660: Advanced mobile app development
(Khuong)

Rock Paper Scissors robot

designed and programmed by Dr. Khuong An Nguyen, 2020

What

Why

How

1

What is mobile computing ?

2

Why has it become so popular ?

3

How to design an effective mobile computing system ?

What

Mobile computing

The technology that enable people to do their work anytime, anywhere.

Why

How

What

Is laptop a mobile device ?

Nomadic computing

Why

How

What

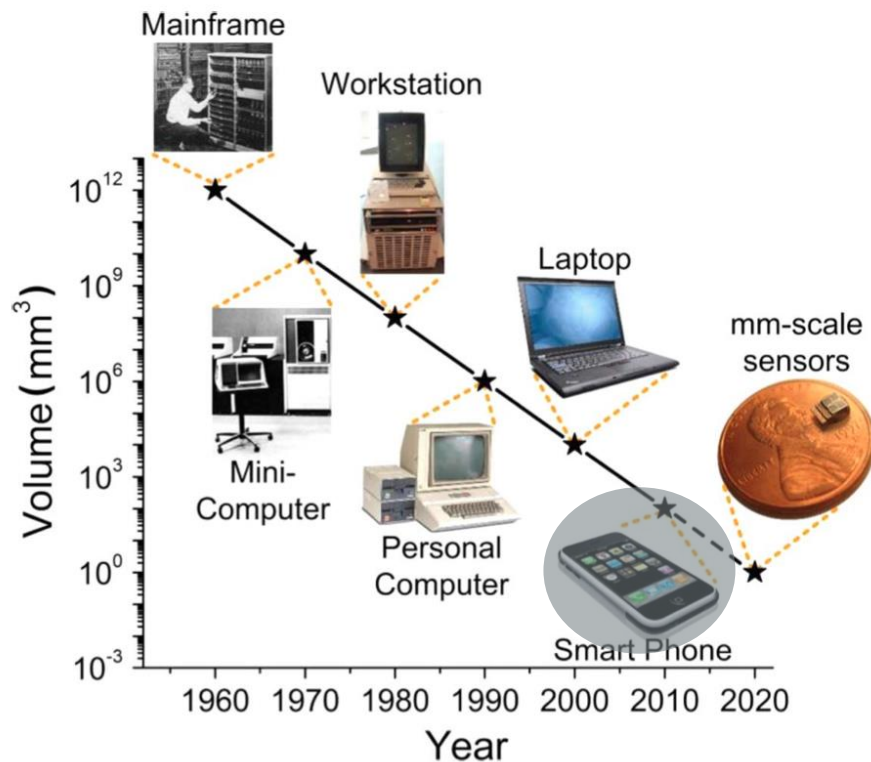

Why

How

Bell's law

“Every decade, a new lower priced computer class forms resulting in new usage and the establishment of a new

industry”

— Gordon Bell, 1972

What

Mobile device structure

1 Handheld, portable device.

2 Computer-like.

3 Full sensing capability.

Why

How

What

Why

How

Human nature

1

Mobility

Our body is not designed to sit in front of a computer.

2

Interaction

We are born to interact with others.

What

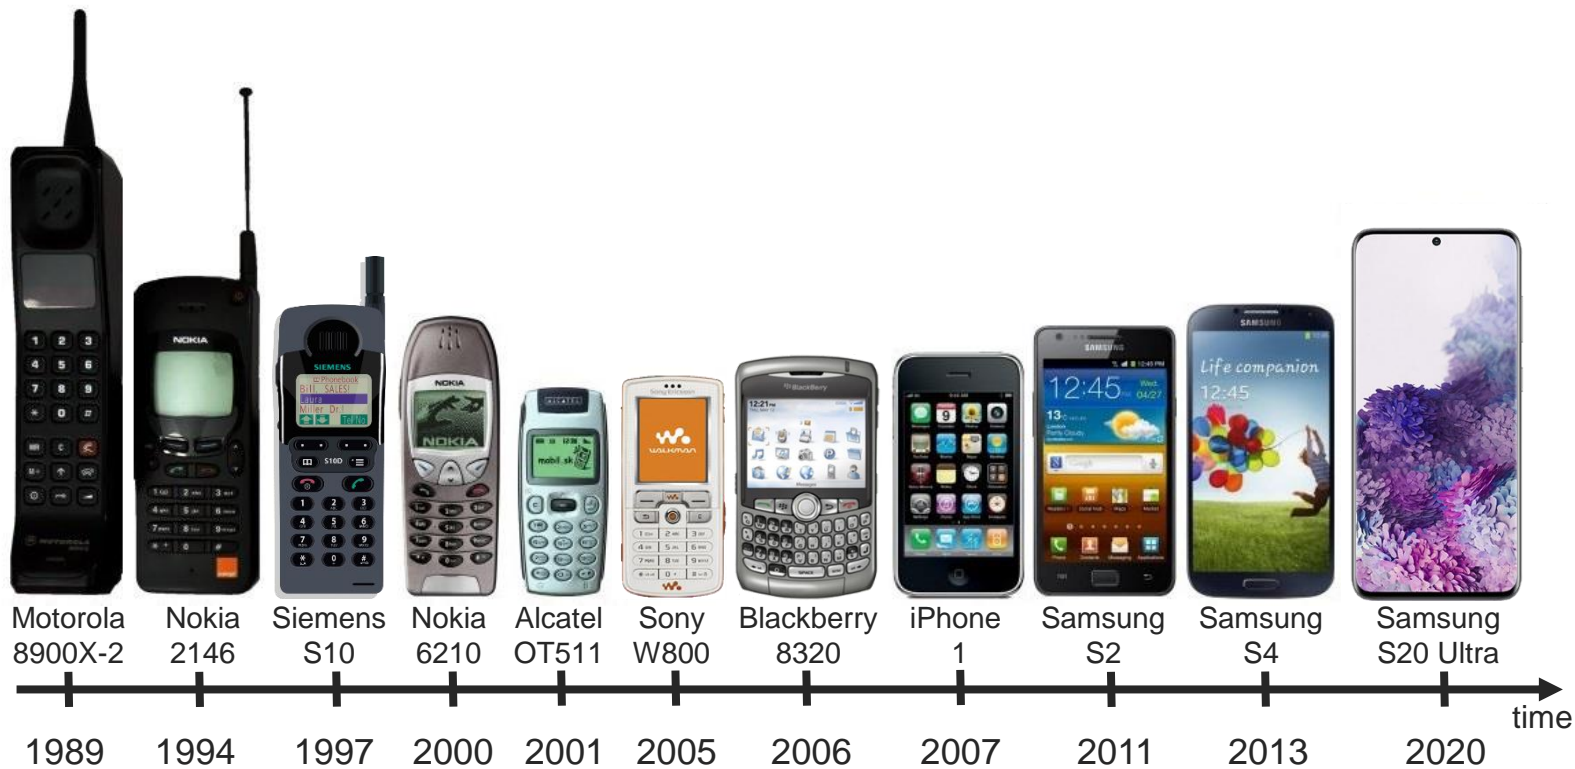

Why

How

Evolution of mobile phone

What

Mobile computing challenges

1

Small Screen

2

Touch interaction

Why

How

What

Why

How

Mobile computing challenges

3

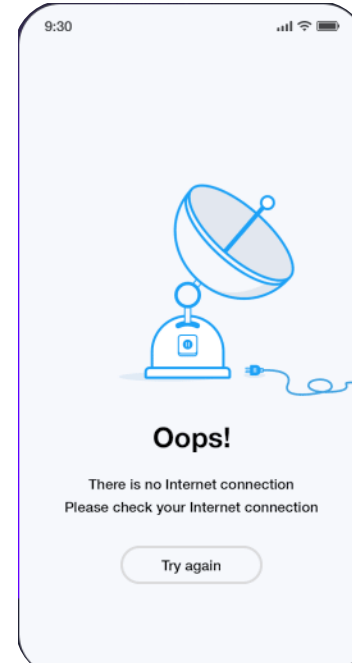

Limited computing power

4

Small memory

5

Intermittent connectivity

What

Why

How

Context

Input Input Input

Input Context Input

What

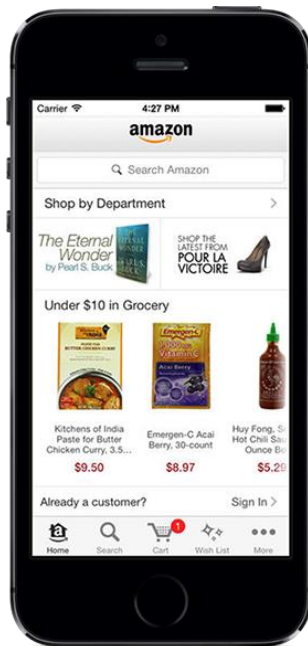

Why

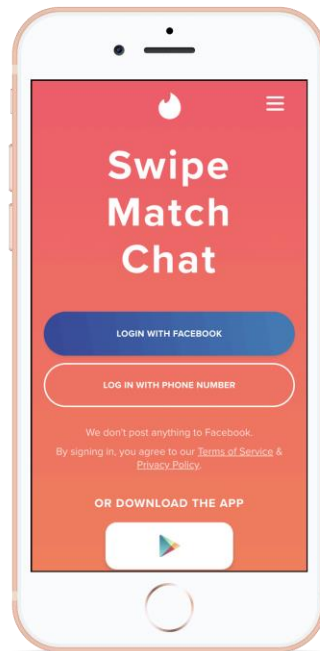

How

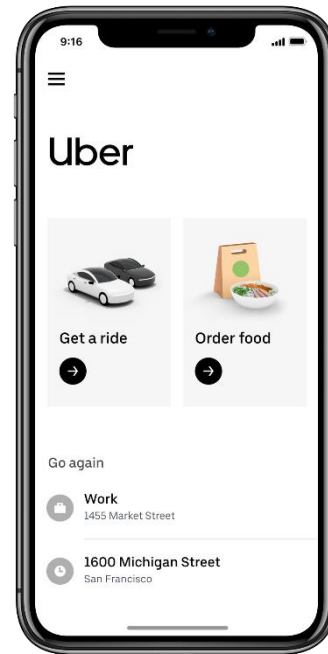

Mobile apps

Amazon

Tinder

Uber

What

Why

How

Context awareness

Portrait to Landscape

GPS location

The idea that computers can both sense and react based on the device's environment and the user's situation.

What

Why

How

Why context awareness ?

1

Reducing distraction

User's attention is a scarce resource.

2

User experience

Better user experience through more sensors.

What

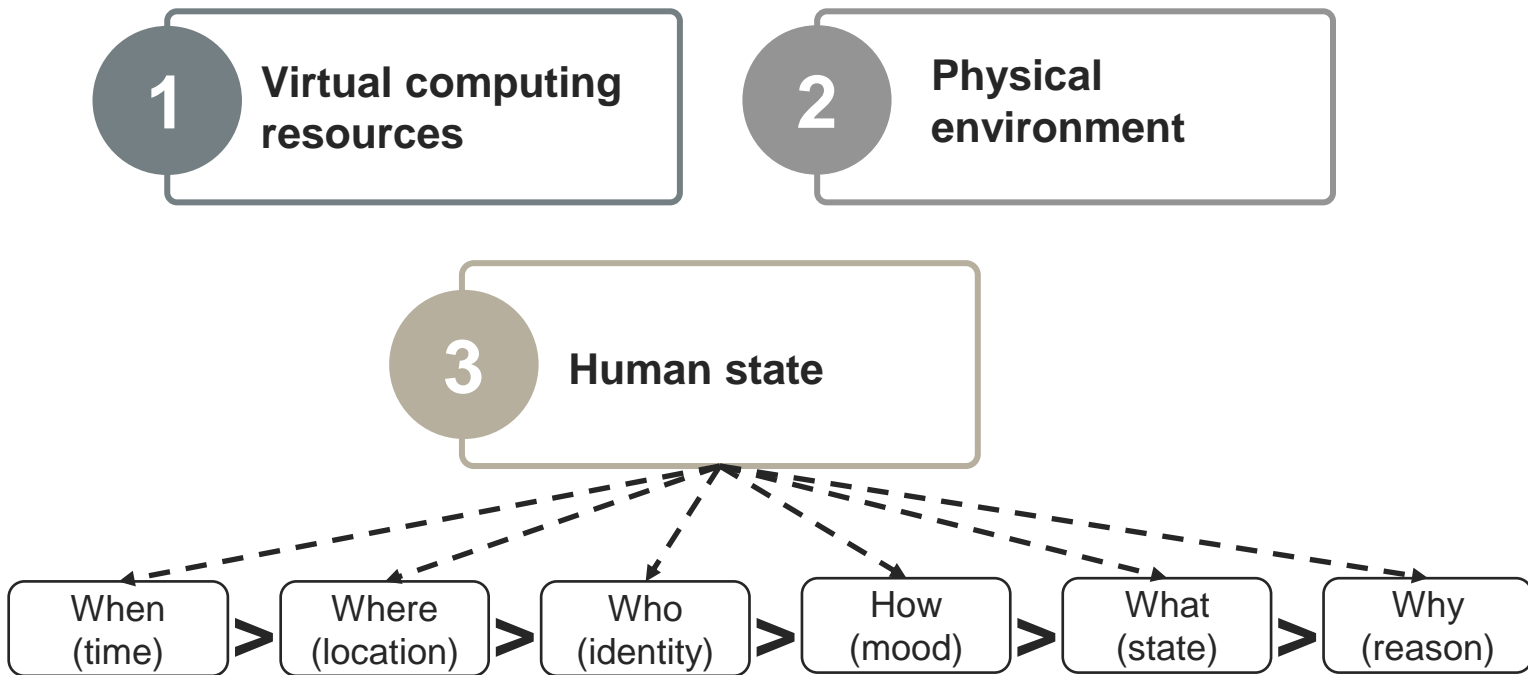

Why

How

Mobile context components

Context = human + physical environment + computing resources

What

Why

How

Obtaining contexts

1

Personalisation

2

Passive awareness

3

Active awareness

What

Why

How

Context (personalisation)

Kindle app

Search
Learn more ►

The user explicitly indicates what they want.

What

Why

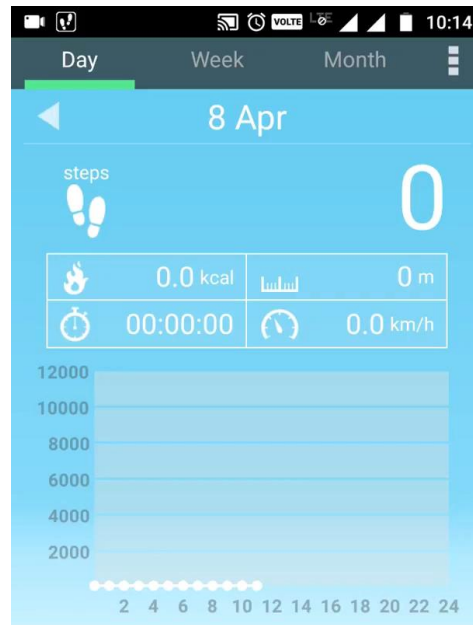

How

Context (passive awareness)

Caller app

Fitness app

Context (active awareness)

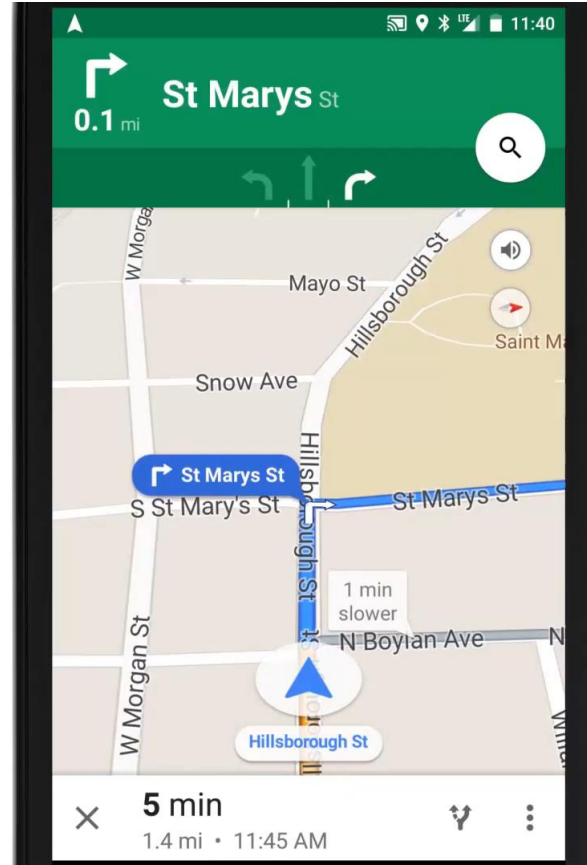

What

Why

How

What

Why

How

Context awareness challenges

1 Incorrect environmental cues

2 Ambiguous user state

3 User privacy

4 User distraction

What

Why

How

Augmented reality apps

Google Translate

What

Why

How

Augmented reality apps

Furniture arrangement

Pokémon GO

What

Why

How

3 steps of Augmented Reality

1

Identifying the object

2

Computing distance and angle

3

Embedding the digital information

What

Challenges of AR on mobile devices

- 1 Limited boundaries of the mobile screen.
- 2 No depth perception on mobile camera.

Why

How
